

Doctors need
information to define
the diagnosis and the
best therapy

They need:

**quick, complete information
biochemical, genomic,
cellular, imaging
neurological, cardiac,
pulmonary, hormonal data
understand the whole
in the shortest time with the
highest quality**

If the medical examinations are ready in 72 hours, the prospects will be better

Early diagnosis is essential

- With conventional methods, diagnostics need a long time to be confirmed
- In oncology, for example, more than 90 days
